

# *Liberty Express Digital Recorder*

## *The Simple Choice for Push-Button Recording!*

**The Liberty Express recorder** is a push-button audio recorder that replaces analog tape decks in courts and hearing rooms where users prefer an easy-to-use solution for digital recording. **Liberty Express** offers push-button controls for all the standard recorder functions such as Record, Pause, Stop and Playback. These functions are provided on a full-size 15-inch screen that may be adjusted to various angles for the best viewing results. The over-size function buttons are easy to locate and use, making your recordings as trouble-free as a quick touch of the screen!

**The Liberty Express recorder** is the ideal solution for rooms requiring a simple recorder that can be used without the necessity for specialized training or support. Once the recorder is removed from the box, setup, and recording can begin within 10 minutes. Simply follow the included quick-start instructions and make the conversion to a reliable, user friendly, digital recorder.

### **Highlights**

- 15 inch touch screen display with over-size operator control buttons
- Recorder includes both full view with integrated notes and optional video recording and control view that is limited to the standard operator controls
- Redundant copy of the proceedings is written simultaneously to secondary media including CD/DVD, flash card, memory stick, network drive or USB drive
- Multi-channel recording allows isolation of audio playback
- Simply plug in the recorder and start recording. No training required
- Transcription on a regular PC using industry standard foot pedal

### **Liberty Express Features**

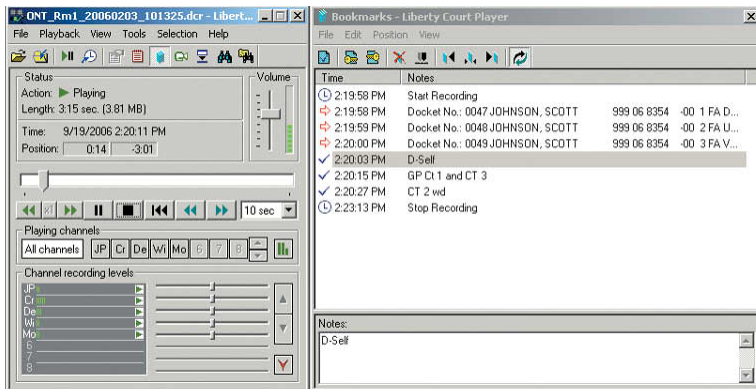

- Support for recording on two, four or eight discrete audio channels.
- A comprehensive visual display of the audio levels across each of the recording channels.
- Confidence Monitoring allows an operator to monitor all channels or easily select an individual channel.
- Integrated note taking that may be used with a regular keyboard\* or an on-screen touch keyboard.
- Comes standard with sufficient space to save over 15,000 channel hours of audio recordings.
- Support for a wide variety of storage media for portability and redundancy. Support includes CDRW/DVDRW, external USB drives, flash cards and memory sticks.
- Network ready! Recordings may be simultaneously and automatically saved to a network. A network connection also allows authorized court staff to monitor the recording and the associated annotations.
- Integrated support for optional video recording\*.
- The audio, annotations and video are all saved to a single file, consolidating all of the data in one place!
- Complimentary playback application for transcription.
- During playback, any individual channel or a mix of channels, may be played.

## Flexible Design to Accommodate Changing Needs

Although the Liberty Express comes in a standard configuration, as detailed in these specifications, custom orders are easily accommodated. You may wish to discuss options such as increased storage capacity and various hard-drive configurations with your local Liberty Express dealer.
